

My name is Inês Mahú, I am Portuguese, and I am a 5th year PhD Student from the PhD Programme in Integrative Biology and Biomedicine of Instituto Gulbenkian de Ciência (IGC) in Oeiras, Portugal. I have a bachelor's degree in Biochemistry, from the University of Porto and a master's degree in Biomedical Research from the University of Coimbra, both in Portugal. And I am currently supervised by Dr Ana Domingos, Principal Investigator of the Obesity Laboratory in IGC and also Associate Professor in Oxford. In our lab, we focus on biologic mechanisms that regulate susceptibility to obesity independently from behaviour.
