

Manfred Hallschmid, PhD, is Professor of Behavioral Neurobiology at the Department of Medical Psychology of the University of Tübingen, Germany.

He obtained his PhD in psychology/human biology in 2005 and received awards by the German Society of Psychology, the German Society of Endocrinology, and the German Diabetes Society. Manfred Hallschmid's primary research area is the central nervous regulation of metabolism in humans with a particular focus on the role of neuropeptidergic messengers, as well as the relationship between sleep, nutrition and cognition.
